

THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 37.

BLAIRMORE, ALBERTA, THURSDAY, SEPTEMBER 13, 1923.

\$2.00 YEARLY

CAMPBELL-PATTERSON

Mr. and Mrs. Peter Patterson and son William returned Sunday evening by motor from Cranbrook, where they had been attending the graduating classes for nurses, their daughter Jean being one of the four successful candidates and recipient of the regulation diploma and medal. Following the ceremony, luncheon was served and a dance ensued. A more interesting ceremony still followed, in which their daughter, Miss Jean B., became united in the holy bonds of matrimony, at the Cranbrook Presbyterian parsonage, to Mr. Frank Townsend Campbell. The important ceremony took place on Saturday evening, September the 8th.

CARD OF THANKS

Mr. and Mrs. J. H. Boulton and Mr. and Mrs. T. Muir, of Coleman, desire to thank all kind friends for assistance and expressions of sympathy in connection with the death of Mr. Robert Morgan.

DEATH OF MRS. EMMA HARTLEY TO ORGANIZE NIGHT CLASSES

The death of Mrs. Emma Hartley occurred on Tuesday, Sept. 4th, at the home of her daughter, Mrs. A. C. Ritchie, Summerville.

Mrs. Hartley was eighty-three years of age and dearly beloved by a large family and many friends. She came to the west nineteen years ago and for three years lived in Pincher Creek. For the past fourteen years she has resided at the home of her daughter, Mrs. Ritchie, of Summerville.

Two daughters, Mrs. Ritchie and Mrs. Borrett, of Bellevue, and five sons survive, to mourn her loss. Three of the sons, Rev. S. A. Hartley, of Calgary; D.J., of Victoria and S.C., of Saskatoon, were present for the funeral, but the remaining two, A.A., of Vancouver, and W.C., of Carman, Man., were unable to attend.

The funeral was held at noon from the home of Mr. and Mrs. Ritchie, Rev. J. N. Wilkinson performing the last sad rites. Interment took place in the New Union Cemetery, Pincher Creek.—Pincher Creek Echo.

A meeting was held at the school house on Tuesday evening, presided over by Chairman Dutil, of the local school board, and addressed by Mr. Baxter, of the Calgary provincial school of technology and art. The new government plan for the operation of night classes and correspondence courses in the various subjects was outlined clearly by Mr. Baxter, but as the attendance was not large, it was decided to defer action until a larger attendance could be secured and a meeting will be held at the schoolhouse on Tuesday evening next, at which it is hoped several classes will be formed.

All who can should avail themselves of the opportunity of taking these courses, which are offered at a very low margin of cost, simply a winter's tuition fee of from five to ten dollars. The government plan provide for support to a maximum of \$250.00, guaranteeing two-thirds of the cost of operating the classes, provided classes enrol not less than ten pupils. The remaining third of the cost will be met by tuition fees.

The local board undertake to provide housing, heat and light for the classes, but it is understood the janitor will have to be remunerated for his extra services.

Last season classes were operated rather successfully and it is pleasing to note that all working under instructor Owen Morgan passed successfully their examinations in mining and mathematics.

It is urgently hoped that a large number of men will attend the meeting on Tuesday next.

A course in dressmaking is also being provided for.

P. Larda has purchased the business of the Coleman Meat Market.

BRITISH COLUMBIA L.O.O.F. GRAND MASTER VISITS AT COLEMAN LODGE

Coleman Lodge No. 88 of the I.O.O.F., has the enviable distinction of being the first subordinate lodge in this province to entertain the grand master of a neighboring jurisdiction for on Monday night they had as their guest, D. H. Proudfoot, of Nelson, grand master of the grand lodge of British Columbia.

The distinguished visitor was accompanied by Past Grand Master J. A. Tully, representative of the grand master of the Alberta Grand Lodge.

Both were accorded a right royal reception and were greeted by large numbers of Oddfellows from the district lodge.

The H. C. grand master, accompanied by Mr. Tully, had been visiting lodges in the southeastern corner of British Columbia, namely Cranbrook, Fernie, Michel and Corbin, and also instituted a new lodge at Kimberley.

Interesting and inspiring addresses from the distinguished guests were fittingly responded to by members of Coleman and Blairmore lodges.

After the meeting, refreshments were served and a social hour spent.

Mr. and Mrs. T. F. Upton, of "Yarrow Home," Fishburn, left on Monday to spend a week with their son, Mr. J. E. Upton, of Blairmore, and their daughter, Mrs. Walters, of Lumberton, prior to leaving for the East on their Golden Wedding trip. They intend visiting at Winnipeg and Chicago before going to Eastern Canada. The wedding gift from their sons and daughters is a handsome "purse" of gold, which is to defray the expense of the wedding trip. The Echo has much pleasure in extending to Mr. and Mrs. Upton hearty congratulations, not only upon the arrival of this auspicious occasion, but more particularly upon their exemplary married life. Happiness has reigned supreme throughout the fifty years and now Mr. and Mrs. Upton are rejoicing in their declining years, in the future aspirations and interests of a loving family.—Pincher Creek Echo. Mr. and Mrs. Upton left Blairmore on Tuesday night for Winnipeg.

Blairmore seems to be a popular hang-out for beggars, both poor and rich, deserving and otherwise. Last Saturday the town seemed to entertain about five, most of them minus a leg or an arm, and some of them known to have left their artificial limbs and their wealth in Calgary or some other centre, so as to the better appeal to the charitably disposed public of this district.

Things are so shaping that we may expect an association to be formed which will demand that depositors of the Home Bank are paid in full, providing the organizers of the association get a rake off of 5 or 10 p.c. That's what happened in the case of the Farmers' Bank and it defeated its own purpose.—Kincaid Review.

Mrs. G. Bond will re-open her music studio on September 15th.

MAIL CONTRACT

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 19th day of October, 1923, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, 14 times per week on the route BLAIRMORE and RAILWAY STATION (Canadian Pacific Railway), from the Postmaster General's pleasure. Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Blairmore and at the office of the Post Office Inspector.

D. A. BRUCE, Post Office Inspector.

TENNIS FINALS

The Pass tennis club champions congregated at Blairmore last Saturday afternoon to play for the Charbonnier Challenge Cup. The team from Coleman, composed of Lindoe and Riddell, won the cup, taking three straight sets from Foote and Rhynas, of Blairmore. The ladies of the local club served tea and an enjoyable time was had by all. Following are the scores:

First Round
Lindoe and Riddell, Coleman, beat Stever and Cherry, Hillcrest, 3-6, 6-3, 6-3.

Smith and Bennett, Blairmore, beat R. Powell and Graham, Coleman, 6-4, 3-6, 6-3.

Young and Rae, Blairmore, beat Smith and Rose, Hillcrest, 1-6, 6-2, 6-4.

Foote and Rhynas, Blairmore, beat Patterson and Howe, Blairmore, 6-1, 6-0.

Second Round
Lindoe and Riddell beat Young and Rae, 2-6, 7-5, 6-4, 6-4.

Foote and Rhynas beat Smith and Bennett, 6-5, 6-3, 1-6, 6-1.

Finals
Lindoe and Riddell won three sets straight from Foote and Rhynas. In the ladies' section, Mrs. J. E. Smith and Mrs. E. A. Elliott won out with two straight sets over the Hillcrest ladies and now have the Charbonnier Cup in their possession.

ELLIS-IRVINE NUPTIALS

The marriage was solemnized by the Rev. D. K. Allan at the home of Mr. and Mrs. W. Lorne, on Tuesday evening, of Miss Jean Ellis, cousin of Mrs. W. Lorne, to Mr. Alexander Irvine. Miss Ellis arrived from Scotland about two weeks ago.

Our guess is that this talk of corsages for men is prompted by vets in a last desperate effort to get tight.

The Fred Carmelo Comedy Co. are back to town, after a successful tour west. This company has been staging most popular plays and their return to this district is welcomed.

Looking Forward

The more you think about the future, and about Opportunity and Success, the more enthusiastic you become about being a money saver. If you have mastered the art of saving, you can forecast with reasonable accuracy how much of a factor you will be in the days of opportunity which are drawing near.

"Double your Savings: Let Cash be Your Friend."

World Insurance Against War

Nearly five years have passed since the signing of the Armistice put an end to actual hostilities in the Great War, to be followed the following year by the Peace Treaty and the creation of the League of Nations with its covenant designed to bring about the peaceable settlement of future disputes between nations. Yet the Allied armies are still in occupation of German soil and within the year the French and Belgian rivers have penetrated further into Germany in an effort to compel recognition and payment of reparations.

Feeling between France and Germany is today possibly even more bitter than it was on the day the big guns ceased "cease fire." France, still fearing future German aggression, is determined to further cripple her traditional enemy and thereby provide an adequate safeguard against any recurrence of the horrors and devastation through which she passed between August, 1914, and November, 1918. Germany contemplates silence and refusal to pay, insisting upon financial liberty to do so.

Russia remains a menace to the peace of the world, distracted by all nations and distrustful of all. Turkey defeated in the war, emerging triumphant from the peace conferences because of jealousies and conflicting interests among the nations allied in the war. Suspensions are still among all the Balkan states, each one more or less fearful of the other, each secretly awaiting an opportunity to wrest from the other territory which they covet or claim rightfully belongs to them.

The United States, whose representatives played a foremost part in bringing the League of Nations into existence and in framing its covenant, refuse to have anything to do with it and stands aloof in so-called splendid isolation from the entanglements which they fear would result from participation in the task of endeavoring to bring order out of the chaos in Europe. Meanwhile, economic ruin stares country after country in the face. National currencies have lost their value, world trade is handicapped, resulting in millions of unemployed in Great Britain, the saddest of all European Powers.

And now because the Italian members of a commission engaged to fix an Albanian boundary line are assassinated, it is alleged to Greece, the Italian Government serves an ultimatum on Greece, where before it is established that Greece were responsible for the outrage, which is reminiscent of Austria's ultimatum to Serbia which precipitated the Great War, and because Greece does not immediately comply with all the terms of the Italian demands, Italy proceeds to bombard a Greek island and take possession of it, and although a member of the League of Nations, practically repudiates her signature to the covenant and declares she will withdraw from the League if it seeks to interfere in the dispute which has arisen with Greece.

Of what value is Italy, or any country, as a member of the League if it remains free to make war on another member? And yet the League of Nations offers the only hope to the world that, just as soon as it feels strong enough to do so, one nation will not again plunge the world into the horrors of another Great War, and one which in its magnitude and slaughter would far surpass the one through which mankind has so recently emerged and which all but destroyed civilization itself.

Canadians sometimes ask themselves why they should be taxed to maintain the League of Nations, and why prominent British and Canadian statesmen should busy themselves travelling over the world to lecture in behalf of the League and encouraging the formation of branches of the League of Nations Society. But surely it is only signs to think a moment it will be brought that the League, imperfect though it may be, offers the only insurance against war, and if there is any insurance worth while it is protection against war.

Italy's attitude only serves to emphasize the importance of organizing public opinion the world over in support of the League. Public opinion makes and unmakes Governments, even where interlocking seems all powerful, and if the masses of the people in all countries, who are the chief sufferers by war, stand solidly back of the League, Governments will fall in line, with the result that the peace-loving League will become all powerful, and nations will be quick to comply with its requests and abide by its impartial decisions.

Even with the League war is possible, without the League war would be not only probable, but almost a certainty in view of the present unsettled state of the world.

Simple and Unpretentious

A certain painter is confined in an asylum. To persons who visit him he says:

"Look at this, it is my latest masterpiece."

They look and are smiling but an engraver has been called. They ask:

"What does that represent?"

"That," says the painter, "represents the measure of the lunatics through the Red Sea."

"This is the Red Sea," says the engraver.

"And where are the lunatics?"

"They have crossed over."

"And the Egyptians?"

"Will be here directly. That's the worst of painting it in simple and unpretentious style," says the painter.

Only a disinterested third party is able to realize that there are two sides to a question.

British Laws

Taft Pays a Tribute to the British Legal Principles

The close ties uniting American and Canadian legal systems, the bench and the bar, were emphasized at the final banquet of the American Bar Association at the St. Paul Auditorium, where Chief Justice Taft, the Earl of Bessborough, J. Hamilton Lewis and others spoke informally. The chief just facilitated the association members on the planned visit to London next year.

"No worthy member of the American bar," says Lord Bessborough, "can visit London and the various courts and law firms and witness the administration of justice there, without feeling a deep gratitude to that country and nation from whom we derive our principles," said the chief justice.

"You will come back proud of the derivation of your law, and anxious to perpetuate and render stronger the bond we should feel for our old home of the law."

Bilious Headaches

Cold Night Sweats
You Quickly Subside These Ailments
By Using

DR. HAMILTON'S PILLS

By Regulating the System, They Bring—
Good Health

Of course the bowels are ordered and relaxed by Dr. Hamilton's Pills, the "bilious remedy," and the blood is renovated, and the result is a renewal of good health.

No need for delay. The sooner you use Dr. Hamilton's Pills the sooner you'll feel the relief, know satisfaction is a healthy, well-regulated system. Sold in yellow boxes, 25c.

The Island Fisheries

Island Seas Abound in Fish of Unsurpassed Size

The National Resources Intelligence Department points out that the inland waters known as the Great Lakes area, stretching 1,500 miles from east to west, and including Lake Winnipeg and the Manitoba waters, yielded in 1921 fresh water fish to the value of \$1,000,000. The fish taken from this area included whitefish, lake trout, lake herring, lake perch, black bass, muskellunge and other varieties. Further west, the waters of the great plains of the Rockies and the vast Hudson Bay area, though now valued at less than \$1,000,000, present great possibilities of future expansion. Such as at least \$1,000,000, present great possibilities of future expansion.

Bear Lake abounds in fish of unsurpassed size and quality, including varieties which have seldom, if ever, been marketed. From the Ottawa District.

A FINE COMPLEXION

Can be Had Through Keeping the Blood Rich and Pure

A girl's complexion is something more than a matter of cosmetics to her vanity. It is an indication of the state of her health. Paler in a given girl indicates a less healthy blood. Dr. Williams' Pink Pills for Pale People is the best remedy for this. It is a blood purifier and a blood builder. It is a blood purifier and a blood builder. It is a blood purifier and a blood builder.

When a girl is her best complexion, pale and yellow, especially if, at the same time, she shows an inclination to the catarrh, a Rheumatism and Indigestion in her work or study, she needs Dr. Williams' Pink Pills. A man who directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in iron, the element that Dr. Williams' Pink Pills can supply. The pills are a blood purifier and a blood builder. It is a blood purifier and a blood builder. It is a blood purifier and a blood builder.

From 1911 to 1921 Saskatchewan farmers have won 229 prizes for their cattle, horses and vegetables at International shows, held in Canada and the United States. Of these a total of 84 were either cowboys or first prizes. The exhibition of what has been a prairie's feature at all the shows where it has been shown.

Lean Scheme For Cattle Feeding

A lean scheme for cattle feeding among the farmers that will enable the farmers to feed and hold cattle in better condition, requirements, has been announced by the Manitoba Cattle Loan Company. It is hoped the result will show a considerable increase in the livestock in the province, with better returns for the farmer.

Stooping Causes Old Age

Doctor Convinced that Standing Erect Will Prolong Life

Dr. Peter Macdonald started the British Medical Association conference at Perthmouth by stating that a stoop of the shoulders caused old age—a direct invasion of the popular theory.

He said that by following the advice of a layman he threw a score of years from his shoulders.

"I was feeling old and decrepit," explained Dr. Macdonald, "when I picked up a book, published by this layman, from a bookstall. I was then a prematurely aged man."

"I saw the author, and he told me that I was old simply because I stooped. Under the treatment he laid down I threw off my stoop, and in a few weeks I became a different man."

Dr. Macdonald is an upright, spruce-looking man, with an eyesight that is as keen as a hawk's.

Human Hair As Cloth

Hair Cloth Withstands Pressure of 4,000 Pounds to Square Inch

Tons of human hair are being turned into cloth by a southern factory to supply the demand of cotton-seed oil mills of that section for a fabric that will withstand, for a time at least, a pressure of 4,000 to 4,500 pounds a square inch. Only that made from hair is strong enough. Formerly it was woven from camel's hair, but the price of that product went to such high levels as to prohibit its use. After a series of tests, a method was devised for weaving human hair in specially constructed machines. The search for a sufficient supply to keep the factory going ended in China, where buyers found a veritable army of coolies ready to sacrifice their long hair for British or American money. Bound in huge bales, the hair arrives at the factory ready for weaving, having already been inspected and sterilized on the way over from the Orient. Combed and carded, it is twisted into threads and fed into the looms, where it is woven into rolls of cloth 1/4 inch thick, the bolt weighing 400 pounds.

With the sole exception of 1915 the sales of binder twine in Saskatchewan are the heaviest in the history of the province and far ahead of last year, according to dealers. One firm sold six million pounds. This firm estimated total consumption for the province this season at between 50,000,000 to 60,000,000 pounds. The price was down half a cent a pound from last year's figures, and the reduction over the past five years is seven cents a pound. The present average price is 13 1/2 cents.

Heavy Demand For Binder Twine

Quantity Used in Saskatchewan Heaviest in History of the Province

Implement dealers also reported a heavier demand for binders than was noted in 1922, one of the best years in the history of the trade.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work gently and painlessly, so that the delicate system is not imperiled. They are thorough, and from the first dose there is improvement in the condition of the system and a cessation of manifestations of internal trouble.

Mine Production In B.C.

According to the prediction of the Hon. Wm. Sloan, Minister of Mines, the year 1923 will probably set a new high record in production for B.C. In 1922 the output was \$35,158,515, making an increase of 25 per cent. over the previous year. The rate of production, which was reached during the closing quarter of last year, has been continued so far this year. The total for the current year should run well over \$40,000,000, and may possibly reach the \$45,000,000 mark.

Nights of Agony come in the train of cancer.

The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Anshin Remedy. It banishes the frightful conditions, clears the passages, and enables one to again sleep as soundly and restfully as a child. Insist on the genuine at any nearby druggist.

Air Force to Use Radio

Equipment is to be installed for

Radio will be installed this winter to increase efficiency of the Vancouver unit, Royal Canadian Air Force, in the flying season of 1924. Major W. A. Steel, Ottawa, of the Royal Canadian Corps of Signals, who has gone to Victoria City to set up radio communication between the flying camps of the Yukon, announces wireless equipment will be installed at the Jericho Beach station and in the flying boats, which will enable the pilot of each airplane to be in constant touch by speech with his base station.

This will be of great service to the Forest Patrol Branch of the Air Force in locating forest fires in unpopulated districts.

Interest Shown in Oil Fields

Recent developments of the oil fields of Southern Alberta have created great interest, and drilling now under way. It is hoped, will show definite results. Construction has started on the plant of the Standard Oil Company, which is expected to be completed by the end of this year, or early next spring.

New York's Skyscrapers

In 1920 the tallest building in New York was only five stories high, and the church spires were conspicuous above them. Now there is no spire in the city that begins to approach in height many of the towering skyscrapers.

RUTS

The world is full of ruts, my boy,
Some shaller an' some deep;
An' every rut is full o' folks
As big as they can heap.
Each one growin' in the ditch
Is growin' at his fate,
An' wishin' he had got his chance
Before it was too late.
They lay it all on someone else
Or say 'twas just their luck—
They never once consider that
'Twas caused by lack o' pluck;
But here's the word o' one that's lived
Clean through from soup to nuts;
The Lord don't hand no derriks
To his folk out o' ruts.
—Kiwamis Magazine.

SUPPOSE, MR. SPEEDER

Suppose that your child should leave
its own yard
For a romp or in search of a ball,
If its mother were busy and had not
the time
To step out and give it a call;
Suppose that some speeder should
race down the street—
As though he were taking a dare,
And crush the life out of your little
child?
Mr. Speeder, do you think you would
care?

Suppose that your mother were cross-
ing the street—
Your mother, now feeble and old,
And some reckless driver should
knock her aside,
Leaving her lifeless and cold;
Could you find an excuse for this
careless act?

Would you really think it fair?
Now putting yourself in this fellow's
place,
Mr. Speeder, do you think you would
care?

BARBAROUS

For true barbarism you will have
to go far to get one better than the
paper-hanger's answer to the minister
when asked on what day he could pa-
per the manse.

"Well, sir," he said, "you see I'm
rather busy now. I hung Mrs. Smith
yesterday. I'm hanging one of your
elders today. I'll drop round and hang
you on Wednesday if it is conven-
ient."

Very little business was transacted
at Monday night's meeting of the
town council.

Modernize Your Home

PEP INTO BUSINESS

Taking any ordinary commercial
enterprise as an illustration, we find
that public support is gained by dint
of everlasting publicity. Appropriations
for advertising purposes are
made far in advance and are usually
based upon a definite percentage of
the anticipated sales. In the case of
a number of well known products, the
expenditure on publicity is as follows:
Arrow Collars 3 1/2 per cent of gross
sales; Champion Spark Plugs 2 per
cent; Colgate's Toothpaste 2 per cent;
Ivory Soap 3 per cent; Old Dutch
Cleanser 10 per cent; Eastman Ko-
linsky 3 per cent; Victor Victrolas 5
per cent; Velvet Tobacco 6 per cent;
Welch's Grape Juice 10 per cent of
the gross sales. The Coca-Cola Co.
expended \$1,200,000 last year in
boosting a five-cent beverage; \$500,
000 was appropriated to advertise
the straw through which to drink it,
and Wrigley's Limited devoted \$3,
000,000 to tell the ruminative publi-
cist about the delectable virtues of a nic-
otined chewing gum.

AN OUTSIDER'S VIEW
OF CANADA

In a recent article, giving a fore-
cast of the domination of the Ameri-
can continent, Dr. Frank Crane has
this to say of Canada: "Few of us
realize the tremendous strides which
Canada has made within the space of
one or two generations. Not so long
ago it was considered a wild waste,
with an inhospitable climate and un-
conquerable distances. Today, having
sprung up as if overnight, it is tra-
versed from the Atlantic to the Pa-
cific by a network of railways, some
of them among the finest in the
world. No country in the world has
had a better start than the United
States and Canada. The people are
of the most intelligent, adventure-
ous and progressive stock. They be-
gan with governing themselves and
they will always keep up. They
are for the most part free from the
hampering religious superstitions that
clog the most of Europe. There is
little or none of the cramping class
tradition that is the curse of Europe.
It is poor soil for socialism, botan-
ism and other isms which are but
reactions from the long tyrannies of
the old world."

CAMPERS AND TRAVELLERS
CAUSE MOST FOREST FIRES

The chief forester of British Col-
umbia, Mr. P. Z. Caverhill, is in Ot-
tawa and makes an interesting state-
ment on this subject as follows:
"Out of a total of 2,591 fires in a
season the greatest single cause of
starting such fires is that listed as
Campers and Travellers, who were
known to be responsible for 625, or
24.2 per cent. There is little doubt
that a number of the fires which
started from 'unknown' causes
amounting to 536 can be attributed to
campers and travellers, so that it is
fairly safe to say that 25 per cent of
all fires in British Columbia last year
were caused by the carelessness of
people who should have the greatest
interest in keeping the forest green."

The editor last week received from
a subscriber the query: "Can you tell
me what the weather is likely to be
next week?" In reply we wrote: "It
is our belief that the weather next
week is likely to be like your subscrip-
tion." The enquirer puzzled his
head for an hour over what we were
diving at when he finally happened
to think of the word "Unsettled." He
sent a cheque the next day.

GOOD CAUSE FOR THANKS

An old deacon, having occasion to
spend a night at an hotel, was as-
signed a room containing three single
beds, two of which already had occu-
pied. Soon after the light was ex-
tinguished, one of those began to
snore so loudly as to prevent the de-
acon from getting to sleep. The snore
increased as the night wore away, un-
til it became absolutely fearful. Some-
times two or three hours after mid-
night the snorer turned himself in bed and
gave a hushed groan and became
silent. The deacon had supposed the
third gentleman asleep, but at this
juncture he heard him exclaim: "He's
dead. Thank God. He's dead!"

CAREFUL MAN

A motorist meeting an old colored
man thinking along the dusty road
generously offered him a lift.
"No, sah, thank you, sah," was the
old man's reply. "Ah reckon mah
legs will take me 'long fast enough."
"Aren't afraid, are you uncle?"
Have you ever been in an automo-
bile?
"Nevah but once, sah," was the re-
ply, "and den Ah didn't let Ah mah
weight down."—Boston Transcript.

AT HELL'S GATE

Some of the stories told of the gate
operated near Coleman under the Al-
berta Liquor Act seem to add not a
little to the farce comedy being en-
acted. A party with a young lady
was motoring by a few weeks since.
The lady fainted at the sight of a
drawn gun and fell upon the arm of
her peaceful lover. The officer ap-
proached and from the other hand
flashed a light that glared blindingly
into the eyes of the innocent driver.
He asked: "Where are you from?"
"Michel," was the reply. "What have
you in your car?" came the next
query. "My lady friend," he replied.
"Have you a bottle?" "No, she's old
enough she don't need it any more!"
was the amusing answer. The officer
blushed and in excitement shouted
"Liquor!" The driver replied "I have
no occasion to lick 'er and I believe
she's dead already!"

Another: Two gentlemen were pass-
ing through from West on Wednesday
afternoon last. The officer, gun in
hand, stopped them at the gate.
"Where are you from?" he asked.
"West," replied the driver. "Where
are you going?" "Home," the driver
responded. "Have you any hard stuff
in the car?" Yes, I had some tools, if
they haven't been stolen." For such
arduous and painful duties the public
of this province are paying well for
the maintenance of a gate that stands
across a Dominion highway. No other
civilized country in the world
would tolerate the operation of such
a farce. Any sane person knows,
and those responsible for the estab-
lishment of the system are not in a
position to deny it, that the booze
gate has not been a paying venture
for the province and has not to any
extent minimized the illegal traffic in
liquor within the province of Alberta,
or between the provinces. The public
so far have been made aware of but
one case where the province has
muddled a little revenue towards the
gate's upkeep, and that case was
cited by us last year, when a bottle
of brandy, obtained legally from a
British Columbia vendor's store for
some other than medicinal purposes,
was taken from an eastbound car and
the driver muddled to the extent of
\$25 and costs on his admission of
"having liquor in his possession" other
than a private dwelling. That
liquor was obtained for a lady at the
order of a medical practitioner, the
man not being of the drinking variety.
The government of this province
allowed that conviction to stand
and while the province may have ben-
efitted to the extent of \$25 financial-
ly, morally we have suffered beyond
figures and the victim has gone
abroad, primed to brand this province
in anything but glowing terms.
Prohibition may have some good
features, but it is certain that cases
such as above cited will not leave a
good impression.

ALBERTA COAL IN
GREAT DEMAND

Were a freight rate in effect per-
manently which would put Alberta
coal on a competitive basis in Ontario,
orders would be on hand almost at
once for at least a quarter of a mil-
lion tons, declared Howard Stutch-
bury, trade commissioner of the pro-
vince, who returned from what was
virtually a tour of triumph through
the eastern province. Mr. Stutchbury
was superintending the distribution of
the 6000 tons of Alberta coal sent
east on the special rate of \$7 at ton
by the Canadian National. He visited
many points in Ontario, accompanied
by officials of the C.M.A. and all of
these points were anxious to get Al-
berta coal, provided a freight rate
was given that would make it pos-
sible. The Ontario government, the
C.M.A., the trades councils of the
cities, the U.F.O., and other organiza-
tions have taken up the campaign,
and are bringing pressure to bear up-
on the Dominion government to bring
about some solution of the problem
arising on the coal. A great
deal of publicity supplied by the pub-
licity branch of this Alberta govern-
ment is being used in the east, and
Mr. Stutchbury's meeting were given
widest possible publicity. He address-
ed as many as seven meetings in a
day.

Print the grandest sermon that ever
fell from inspired lips and not ten
per cent will read it. Print a de-
tailed account of some female bunco
or a sensational divorce suit in high
life and ninety-nine per cent of the
very elect will make a dive for the
gray carp or a nasty worm, devour
every word and then roll their eyes
heaven-ward like a calf with the colic
and wonder what this wicked old
world is coming to.—Ex.

W. H. Reader, superintendent of
parks, Calgary, in an article in the
Calgary Herald, praises very highly
the Bellevue Flower Show held on
Labor Day.

A streamer and confetti dance will
be given in the Oddfellows' Hall at
Blairmore on Friday night, proceeds to
go to the new skating rink funds.

It was a generally accepted idea in
Canada that a depositor in one of our
chartered banks was protected against
loss by the government. In view of
the Home Bank collapse this idea is
erroneous. This bank paid a regular
quarterly dividend at the rate of 7
per cent since August 1920. The Fin-
ancial Post believes that the Canadi-
an Bankers' Association should inter-
est itself actively in doing something
to restore public confidence. The pre-
sent system of government reports is
now regarded as a joke. If something
is not done there will result such a
public agitation as may lead to legis-
lation of such a radical character as
will endanger the whole financial fa-
bric of the country. If there are
further adjustments to be made to re-
store a healthy banking position they
should be made at once so that busi-
ness may be assured as to the future.
—High River Times.

It is a joke to think that booze can
be stopped from crossing an "imagin-
ary" boundary line between the United
States and Canada, extending
thousands of miles between the At-
lantic and Pacific oceans without a
barrier, without a gate, without a
gun, without a torch-light and with-
out a search; while here in this pro-
vince a gate must be operated to stop
an "imaginary" flow of booze into
this province from a neighboring
province, in which a man with a bot-
tle legally purchased has never been
considered a criminal. The success of
that gate is also "imaginary" in the
extreme, for it is not curtailing the
illicit liquor traffic an iota, as can be
proven by figures covering the op-
eration of the booze gate.

The Pincher Creek flour mill, one
of the oldest land-marks, is being
torn down to be re-erected at Lund-
breck by the Doukhobor colony. The
mill at Lundbreck will be operated by
water power generated from Lund-
breck falls, about two miles west.

The Jewish New Year 5684 was
celebrated on Tuesday of this week.

About half an honest candidate can
be given in the Oddfellows' Hall at
Blairmore on Friday night, proceeds to
go to the new skating rink funds.

JOHN F. MILLER

Alberta's Sight Specialist

Of Calgary, 404 Underwood Block, will be at
COSMOPOLITAN HOTEL, BLAIRMORE,
—THURSDAY, SEPTEMBER 20th—

Fully equipped to make scientific examination and
correction of the eyes of old and young. His work is
well known in the Pass.

W. M. DAVIDSON, M.L.A.

EDITOR OF THE MORNING ALBERTAN

says

Clause "D" Does Not Mean the
Return of the Bar

Writing editorially August 16th he says:

"The Moderationists have always in-
sisted even when appearing before the Leg-
islative committee drafting the questions,
that they did not want the return of the bar
and included such a statement in the pro-
posed ballot submitted at the time. The
Albertan is quite confident that if "D" pass-
es, this Government and this Legislature
will do their utmost to have conditions as
different as possible from the old days of
the bar.

It doubts, AFTER THE REPEATED
STATEMENTS OF THE MODERATION-
ISTS, if any Government or Legislature
would dare to permit what we generally re-
gard as the old bar system."

DO NOT BE FOOLED—The Modera-
tionists are honest in their statements that
they do not want the return of the Bar.

Branch of the
MODERATION LEAGUE OF ALBERTA

MINING SLUMP IS A
THING OF THE PAST

A report on the mineral production of Canada for the first six months of 1923 just issued by the Dominion bureau of statistics shows that the mining industry has recovered almost entirely from the slump of the last few years. The production of the mineral commodities covered amounts to \$87,152,348 in value as against \$80,861,109 for the same period last year, an increase of 8.4 per cent. The production of metallic minerals is valued at \$39,244,614, while that of the non-metallic amounts to \$47,907,734. These show increases of 48 per cent and 41 per cent respectively, the corresponding productions for 1922 being \$26,475,544 and \$33,885,565.

In the metallic section the outstanding increases were in the production of nickel and copper. The surplus stock existing at the end of the war seems to have been absorbed and from now on a steady production is looked for. The increase for the full year promises to be still greater, as one large producer did not start operations until well on in June.

The gold mining industry is in a satisfactory condition, although the production shows a slight falling off from the corresponding period last year. This was due entirely to the prolonged power shortage in Porcupine this spring, a dry fall followed by a late break-up of ice on the lakes and rivers proving a severe handicap to the power companies. With increased crushing facilities and one new producer assured it is expected that the 1923 total will equal that of 1922. The gold production of Canada for the first six months of 1923 amounted to 530,402 fine ounces, valued at \$10,964,382.

Geol. Everybody has noticed a vast improvement in the roads in this district since the Hon. Alex. Ross set some of his men to work surveying for a new road.

EQUAL RIGHTS FOR WOMEN

Seventy-five years ago the village of Seneca Falls, New York, was the scene of a convention of women who met to declare to the world their determination that all political, legal, economic and social discriminations between men and women should be swept away. The convention adopted a fiery indictment of man's attitude towards woman, indictment far more severe than that which Thomas Jefferson drew against George III. in the immortal Declaration of Independence. Man was accused of "repeated injuries and usurpations towards woman"; of withholding from her the franchise; of depriving her if married, of the right to the wages she earned and denying her the privilege of entering the most honorable and lucrative employments; of enforcing her against her social standards that he did not himself observe; and of trying subtly to destroy her self-confidence and crush her self-respect.

It was an extraordinary document, which the world of the day did not take with sufficient seriousness. For although it did accuse man of some things for which he had no more moral responsibility than woman had, it was a just protest against the political and economic dependence of women uttered with a spirit that might well have given everyone who heard it reason to expect much from a movement so bravely launched.

The movement has already accomplished a great deal; but the descendants of the women of 1848 are by no means satisfied. Meeting again at Seneca Falls, the Women's party has drawn up a proposed constitutional amendment assuring to "men and women equal rights throughout the United States and every place subject to its jurisdiction."

Equal rights are we understand the definition of the Woman's party, include jury duty for women everywhere, the same provisions of law for

both men and women concerning the control of property and the guardianship of children, opening all examinations for government employment to both sexes on equal terms, prohibiting any discrimination against women in the better paid offices and in employment after marriage, equal pay for men and women in similar positions, so far as any government can enforce it, and the repeal of any laws that discriminate between men and women in industry.

Some of the demands are obviously just and will arouse no opposition among the intelligent people. But those men and women who have worked for the laws that now protect women against the longer hours that are often required of men in industry do not like the prospect of seeing those laws made unconstitutional. And there are a great many people of both sexes who still believe that the social and economic functions of men and women should be allowed to differ, who distrust the theory that the two sexes should of right be treated exactly alike, and who fear the results on society of encouraging economic and political competition between them. Those persons will oppose an amendment so sweeping in its terms, and there are enough of them at present to make the issue doubtful.

Women should control their own property, equally with their husbands; control their own children and have equal opportunities in the occupations that they select. That is all clear and could be measurably attained by law. As for the other demands we incline to believe that many of them are more or less beyond the law, and that certain social and economic influences that cannot be controlled by legislation will determine how far they shall be obtained.—Ex.

The Prince of Wales landed in Canada yesterday off the Empress of France. He is now on his way to the royal ranch at High River, where he will spend a month or so.

SMOKELESS COAL INVENTOR
PRAISES "SPOTLESS TOWNS"

HUNTINGTON, W. Va., Sept. 12.—Emil Piron, inventor of the low temperature coal distillation process that Henry Ford has set out to prove to be the only practicable system for "burning coal twice," as exclusively described in the Christian Science Monitor several weeks ago, today looked over the experimental plant which first proved his theories here. He conferred with officials of the Huntington Coal Distillation Company, which controls the United States rights to the Piron process.

The writer found the noted Belgian chemist engineer in his hotel room, perusing the latest report on the progress of the great plant Henry Ford is building at Walkerville, Ontario, to demonstrate the Piron process. All indications pointed to the plant being in operation by Christmas.

"You ask me will our invention lower the price of gasoline, will it make cheaper illuminating gas, will it provide a substitute for anthracite at a lower cost, will it mean cheaper fertilizer, will it mean cheaper motor cars; always everyone wants to express the success of an invention in dollars and cents," and so saying Mr. Piron gave a typical Belgian shrug.

He then continued: "Perhaps, low temperature distillation of coal will do all these things you suggest. It is more than likely that it will. But it is not better to think of what we are trying to do in terms of comfort, in terms of more pleasant living?"

Think of this, for instance. Our invention will make it possible for any town to become a really clean community; we will provide any community where any coal is obtainable with an absolutely smokeless fuel—not a coal smokeless in name only, like most of our low volatile coals, but actually smokeless. There will be no soot. Both homes and factories can use it because of its cheapness. Here in Huntington you are fortunate because no coal is burned, just natural gas. You have a spotlessly clean city where I can wear a white collar two days. Every city can be like that when "carbolic," or semi-coke, is obtainable. Think of the greater pleasures of living under such conditions.

The fact that we expect to recover 10 gallons of gasoline from a ton of coal may not necessarily mean very low-priced gasoline. But, with plants of our system in operation all over the country, it is possible to produce enough gasoline to make it a big factor in the supply of the Nation. The additional supply, this knowledge that the mountains and the underground regions containing coal hold an almost inexhaustible supply of gasoline will in itself serve to curb any tendency to create exorbitant prices for motor fuel. It will be a constant check—the anxiety as to high priced motor fuel may be dismissed and the pleasure of motoring brought within the reach of the greater multitudes.

And it is not reasonable to expect that American industry, when it learns how to make valuable much of the coal it is now wasting, can accomplish more and add a little here and there to the joy of living, for us all?

The fact that this invention promises to make a wealthy man of him did not awaken Mr. Piron's enthusiasm. Being wealthy will be no new experience for him. He was possessed of much of the world's goods when he was active in Russia, Germany and Belgium with the by-product interests over there. It was when he was installing by-product ovens in Russia that the revolution broke out, and Mr. Piron escaped from Russia with little but the clothes he wore, a very poor man again. He came to the United States and worked upward again, turning to his experiments on low temperature distillation.

He asked that one point be brought out emphatically. In the Christian Science Monitor. It was this:

I wish you would correct a very unfortunate misstatement by one of your contemporary journalists. Mr. Arthur Brisbane, Mr. Brisbane, several days ago in his column advertised in the Hearst papers, made one

of his paragraphs say that Mr. Ford is now doing only what the Germans have been doing for years, extracting all the valuable by-products of coal.

This is absolutely untrue and I consider it an un-American statement. The Germans, or any others, have not solved the problem of low temperature distillation. They have done nothing that American by-product plants are not now doing under high temperature systems.

Mr. Brisbane should be told that this invention is American; that the first experiments were made possible by the progressive spirit of Americans; and that Mr. Ford, a true American, is spending millions and devoting his entire staff of engineers and all his resources to making this invention a success—an American success. My adopted country will have the credit of pioneering in this field and we need not point to any foreign country as having shown us the way.

Mr. Piron looks forward to the time when, through his system of handling coal, industries will operate largely on gas; industrial communities will be free of the blight of soot and smoke. He sees a time when each coal-producing state will be independent of the others or at least can draw its fuel from the nearest coal field, obviating long hauls, railroad congestion, high freights and so forth. This will come about, he thinks, through making smokeless domestic fuel from any of the high volatile coals now produced. He sees artificial coal gas coming to the rescue when natural gas is exhausted.

Mr. Piron was asked:

"If Mr. Ford's plant at Walkerville and Detroit are successful and he has the only working plants that accomplish the wonders you describe, will it not make him a very powerful man?"

"Yes, surely," was the quick reply, "but you can trust Mr. Ford to use that power for good. I have been asked if he would not try to control the public utilities and become a gasoline magnate and do all other things that he could do by keeping this invention to himself for his own good. That is all ridiculous. Mr. Ford, perhaps, sees in this thing in which he is spending millions a chance to make those millions bring more pleasure to humanity than if spent in any other way of which he knows. It is his way of doing something big for others. I express only my own view in this, but I think I am right."

HINT FOR FISHERMEN

"It is thunder that causes so many worms to be seen on the ground after a hard rain," says an Alabama citizen. His theory is that the worms are driven out of the ground by the vibration caused by thunder. They are never seen except after an unusually hard thunderstorm. The thunder does it; not the rain.

"Down here, where we would rather fish than eat, if you ask a native about getting his bait he will tell you that he is going to 'fiddle 'em out' or 'saw 'em out.' He drives a piece of stout plank down in the ground a foot and a half or two feet deep and then takes a heavy piece of plank and draws it across the top of the piece driven in the ground for a few minutes, causing a vibration of the ground, and all the worms within a radius of several feet will come out in a hurry."

A SOLICITOR'S COCKTAIL

Take two quarts of good Scotch whiskey, four pounds of minced bananas, seven pounds of onions, two pounds of T-bone steak and four ounces of nine-year-old garlic. Stir well for four hours. Doose—one half wineglassful every fifteen minutes, if business permits. Does may be doubled after the first day.

G. K. Sirett & Co., of Bellevue, are busy decorating some of the offices and rooms in the McLaren block.

Speculators in Toronto and Montreal are offering Home Bank deposits sixty and seventy cents on the dollar.

WHAT TOURIST TRAFFIC MEANS
TO RURAL BRITISH COLUMBIA

One-third of every dollar spent in British Columbia by tourists will ultimately find its way into rural B.C., because, roughly, nearly a half of what every tourist spends goes for food and other products that originate on the farm.

Of the \$400,000,000 spent here by tourists during the present season, at least \$12,000,000 will go into the pockets of country folk. If B.C.'s annual tourist income can be increased by judicious advertising to \$100,000,000, rural British Columbia will be assured of over \$30,000,000 increased revenue every year.

The campaign for tourists is not a campaign for the increased prosperity of a few Vancouver merchants and others who come directly in touch with tourist business. Money circulates. If tourists spend \$100,000,000 here every year, that \$100,000,000 passes eventually through the hands of every individual in the province, be he farmer, hotelman, laborer, or mechanic. And the farmer, by the very productive nature of his calling, must come in ultimately for the largest share.

Farmers will find it good business to back the tourist campaign with every resource available.—Vancouver Sun.

Cyclone Thompson secured a fall with Ernie Arthur in a wrestling match at Fernie on Saturday night last. Thompson was at least ten pounds the heavier.

Here and There

Protection of migratory birds has been added to the duties of the Canadian Pacific Railway's constabulary.

Airplanes attached to the Ontario Forestry Department are now equipped with radio sending apparatus so that they can keep in constant touch with the chief and other rangers.

There was an increase of sixty-three per cent in the number of immigrants to Canada during the last three months as compared with the corresponding period of last year.

Canadian Pacific agents in Britain recruited nearly five thousand men for work in the harvest fields of Western Canada, and, through lack of steamship accommodation closed their doors on as many more who, attracted by the special harvest rate, sought to enter Canada.

The branch lines program of the Canadian Pacific Railway carried out this year will bring into operation on the prairie a larger mileage than any one year since 1914. Of the 481 miles of line under construction, 281 miles will be ready for handling grain in the Fall and of the balance, 115 miles will be ready for use by the winter freeze-up.

A building has been acquired by the University of Toronto to be entirely devoted to the manufacture of insulin. This will be the only factory in Canada where the curative fluid in commercial quantities and, although it is manufactured in the United States, Great Britain and Denmark, the Canadian product will be sold throughout the world.

Dawson City recently celebrated the twenty-seventh anniversary of the discovery of the Klondike. In an exhibition of Yukon products, weighing thirty pounds, potatoes as big as a man's head, pumpkins as big as watermelons, wheat, oats and barley bore witness to the fertility of the Yukon soil. Side by side with these ranged gold nuggets, gold dust and silver bars.

Dr. James Inchea, Commissioner of Police, Detroit, and a guest at the Canadian Pacific Bungalow Camp at Nipigon, holds the record for the biggest speckled trout caught in the Nipigon River this season, having captured a fish weighing 7½ pounds. This catch was above the average, but a large number of six pounders have been taken from the Nipigon this season. Several years ago, and from practically the same place, Dr. J. W. Cook, of Earl William, caught the world's record speckled trout, which weighed fourteen and one-half pounds, and was more than two and a half feet long.

A record was established recently when one of the latest type of Canadian Pacific locomotives drew a train of 45 cars of newspaper, weighing more than 1,100 tons, from the plant of the Athliti Pulp and Paper Company, North Bay to Toronto, without mishap. Ordinarily, it would have taken two passenger engines to haul such a load, and 320 miles. After proving its worth by this feat the huge engine, together with an all steel fire consuming of the latest model tourist, dining and sleeping cars, and a baggage and commissary car, formed part of the Canadian Pacific exhibit at the National Exhibition at Toronto.

Democracy On Trial

Honesty in Politics is One of the First Essentials

(By J. G. Shearer)

A former article emphasized the necessity for a high standard in mind and morals on the part of the citizens generally if democracy is to prove in practice an efficient form of government.

One of the points at which democracy is tested and fit consequent danger is at the ballot box. The secret ballot is a safeguard of honesty and freedom in this expression of political manhood and womanhood. It makes possible an honest vote. It is not sufficient to guarantee it. There are sinister influences at work. One of these is the purchasing of votes. The effort undoubtedly is too frequently made in keen party contests. In many cases it is successful. An honored member of the House of Commons is authority for the statement in his possession—a signed statement—that in his constituency, a rural one in Eastern Canada, 70 per cent. of the electors were open to receive whiskey or money as both, and 50 per cent. impudent candidates or workers for money or liquor or both. There are cases on public record where professing Christian men were the agents for distribution of corrupt funds and liquor. It would seem that many men who are honest in business have no conception of honesty in politics. The president of one of the universities tells that when he went to vote in a certain general election he met an official of a rural constituency in the dominion to which he belonged and in conversation was informed that this man had two sons voting for the first time at this election and that he, the father, had thought well to give them advice about their duty in the exercise of their new power of manhood, and had said, "boys take care, the Tories will give you and take all the money the Grits will give you—but, vote your conscience!" What did this man, men by "giving your conscience?" Simply "Vote your party ticket."

But aside from cases of rigid party electors who will take money but not sell their votes the party system lends itself to the buying and selling of votes, legislature or municipal council. In each 1,000 electors in a close constituency there may be 400 of one party, 400 of the other, 100 independent and 100 purchasable voters. The keen election leaders will concentrate on the 200, half of whom can be bought, and the other half must be persuaded. A purchasable ten per cent. may decide an election in a large number of constituencies. Here lies a very strong temptation to unscrupulous candidates and party leaders. The history of practical politics in Canada provides all too clear and unsavory evidence that in a certain number of constituencies the temptation has been yielded to and the will of the people defeated. Democracy has in that case and to that extent failed. Practical politicians not infrequently speak of politics as "the greatest game on earth." It is merely a stronger struggle for the spoils for the victory—and glory—not the spoils, there is practical certainty that the welfare of the people will be a secondary consideration if a consideration at all. Politics ought to be the "science of social welfare," this only this always. All else is secondary and comparatively unimportant.

The growth of a spirit of independence among electors and the consequent readiness to vote against the party of their preference is a hopeful sign of the times. The rugged independence of the electorate in Great Britain is well known. The average life of a government there is not above four or five years. And the life of governments in Canada would seem to be growing shorter. Insofar as this indicates a development of the spirit of independence in politics it would seem to be in the interests of the whole people and to make for successful democracy.

One of the greatest needs is a larger number of men and women of real ability offering themselves as representatives. To such men and women this means real sacrifice of self-interest. But it means also the spirit of service in politics. Service ought to be the universal ideal not in politics alone but in commerce, industry, the professions—indeed in every sphere of life.

One thing that would lead more worth-while men and women to offer themselves for service in politics is the elimination of shoddy abuses from platform and press in political campaigning which in the past has been, and in the present is, altogether too common.

It would be highly amusing were it not so serious to read the purely party organs and to hear some leaders speeches in a heated contest. It is simply wholesale unblushing misrepresentation and slander.

When to Plant Small Fruits and Ornamentals

Fruit Planting is Recommended For Certain Varieties

Dealing with fall planting, Mr. W. T. Macoun, Dominion Horticulturist, says that bush fruits, such as currants and gooseberries, which begin growth early in the spring, are best planted in the fall—the latter part of September. Raspberries can be planted either in the fall or in the spring, but fall planting gives opportunity for replacement in the spring if any should die.

If strawberries are planted in the fall, it should be early in September, so as to become rooted before winter, but early in the spring is the ideal time to plant strawberries. If not planted then, Mr. Macoun says it would be advisable to use pot plants and plant in August, and then it might be possible to obtain fruit the following spring.

Spring is the proper time for planting fruit trees, ornamental trees and shrubs, although, adds our authority—as it will not matter much if the branches of shrubs are killed back at first—should the fall be found more convenient they can be planted quite satisfactorily then. Conifers should not be planted in the fall. Roses may be planted quite successfully in the fall, and may escape winter killing. If planted in the spring, it is advisable that they be planted at the first opportunity in order to be well established before the hot weather sets in. Fall is the best time to plant most herbaceous perennials. The peony should be planted in September if possible.

Rebuilding Regent Street

Will Be Finest in World Says London Agent

The bold prophecy that within five years' time Regent Street will be the finest business thoroughfare in the world, not only from a business standpoint, but from the architectural point of view, as well, has just been made by a well-known London real estate agent. Certainly money is being spent "like water" in rebuilding the famous street. Its appearance is being completely changed. Buildings are being made higher, shopfronts more imposing. There is scarcely a building that has not lately been, or is just about to be, in the hands of the builders. For one shop, with a frontage of only 37 feet the rent, we learn on the authority of the estate agent in question, is to be £5,000 a year, another building in the same street has a ground rent of £25,000, and the purchase price of the building lease will be something like £500,000.

What is the history of this famous street? It was built to the design of John Nash and takes its name from the Prince Regent, afterwards George IV. "The people know as the Quadrant (says Augustus J. C. Hare, in his "Walks in London") originally had colonnades advancing the whole width of the pavement; these were removed in 1848, to the great injury of the effect."

Cross Highest Passes of Rockies

Nine Men and Eight Women Complete Spectacular Feat

Having completed one of the most spectacular crossings of the Rockies, occupying 28 days, an expedition, organized by the Appalachian Mountain Club of the United States have arrived at Jasper Park. The expedition headed by Dean Peabody, of Boston, left this point journeying with a pack train of sixty-five horses across the highest passes of the Rockies, through 250 miles of mountain territory seldom traversed and never before any expedition of this kind. There are nine men and eight women in the expedition.

Will Investigate Milling Industry

Sir William Nicholls, governor director of Shilliers Milling and Associated Industries, a \$35,000,000 concern, has called from Southampton for a tour of Canada. He will investigate the growing and handling of wheat, and will look into the flour milling industry in Western Canada, also the shipping facilities which exist for wheat and flour via Vancouver. His prospects prove favorable. It is declared, his company will invest large sums of money in the flour milling industry of Western Canada.

Running Behind

"Is your business on a running basis yet?"

"I should say so. I always run when I see a creditor coming."—Boston Transcript.

A twin grand piano resembling two instruments set end to end and with two keyboards and an enlarged sound-board has been invented in Germany.

found under peat in East Yorkshire, Eng., are dated to date back from 10,000 to 12,000 B.C.

Cutting a Wide Swath

(Chapman's Weekly)

Exports of Wheat and Flour

Exports to United Kingdom Show a Gratifying Increase

In the nine months ending May 31st last, Canada exported to the United Kingdom 146,910,333 bushels of wheat valued at \$163,711,444, compared with 131,125,687 bushels valued at \$111,736,057. In the corresponding period of 1922. To the United States for the same period 10,638,616 bushels valued at \$11,430,534, compared with 11,863,660 bushels valued at \$13,872,800 last year. The exports of wheat from the United Kingdom in the nine months this year were 3,736,310 barrels valued at \$20,841,585 compared with 3,576,420 barrels valued at \$22,577,264 last year. To the United States this year were exported 280,243 barrels of wheat flour valued at \$3,306,222, compared with 548,278 barrels valued at \$3,408,711 in 1922. The exports of wheat in the nine months ending May 31 this year were 183,269,086 bushels valued at \$207,112,321, compared with 125,716,932 bushels valued at \$165,559,367 in 1922, and of wheat flour the total this year were 8,732,644 barrels valued at \$49,711,852, compared with 6,036,618 barrels valued at \$38,720,368 in 1922. It will be noticed that exports to the United Kingdom this year show a gratifying increase, but that in exports to the United States there is a decrease of over twelve hundred thousand bushels of wheat and 168,035 barrels of flour.

No Damage Done

After much excitement the Smiths had at last managed to catch the train. Now, when they could sit quietly for a while, they began to wonder if they had left anything behind.

Mrs. Smith gave a shriek.

"Oh, Harry," she gasped, "I forgot to turn off the electric-iron!"

"No, worry, darling," he replied, "nothing will burn. I forgot to turn off the shower bath."—Exchange.

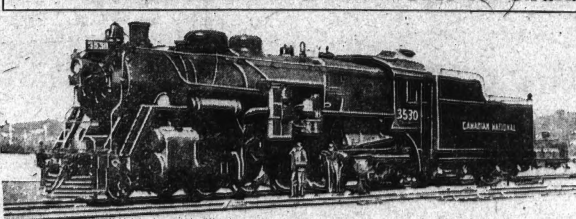

Settlements at World's Ends

Tashak, in Greenland, is the most northerly settlement in the world, and is over 1,000 miles from the North Pole. Probably the most southerly settlement is the whaling station where Shackleton lies buried in South Georgia.

Mesopotamia Railways have the distinction of operating what is perhaps the slowest train in the world. The 120-mile stretch from Tiaru to Baghdad north is covered in 18 hours, about 6½ miles an hour.

Our idea of a patient man is the one who bought a century plant to see if it really would bloom every hundred years.

HUGE LOCOMOTIVES OF THE MIKADO TYPE ARRIVE FOR FALL GRAIN RUSH ON C.N.R.

New locomotives of the Mikado type for the movement of the 1923 grain crop over the Canadian National Railways have begun to reach the West. The new locomotives, which were built at Montreal, are of the latest type with all new improvements. They are 78 feet in length and weigh approximately 450,000 pounds. Each has a drawbar pull equal to 5,000 tons. The engines, which are for freight use, are equipped with automatic stokers, Westinghouse air brakes and air reverse and are for freight use. They are equipped with Worthington feeders, water heater and pump. One of the changes in the new engine is the cab design, all mounting being installed in the cab instead of inside the cab as in former types.

Twenty-three of the new engines are coming West for the Manitoba division in time for the beginning of the grain movement. An idea of the size of the new engines may be gathered from the fact that before starting out on a run they require 12 tons of the Booster truck and text of those to be delivered later will have Booster engines installed. These provide practically additional motive power on the tender and are of great value in starting heavy trains. The engines are being placed in service as quickly as they reach the Western divisions.

King Well Versed On Naval Matters

Could Talk Active Command of Battleship or Cruiser

The King was at his "best heat"—no other word will fit the occasion—and those of us who have the honor of his acquaintance know well what that means—when he dined with Admiral of the Fleet Earl Beatty at Mall House. Before all else, the King is a sailor, and his deep regret at having to abandon his active naval career when he became heir-apparent is now not adequately remembered. He has never lost his passion for the senior service, and there is no indication, no new development, either in engineering or gunnery, in connection with his ships with which he does not make himself thoroughly conversant. To mention our monarch could take active command of any battleship or cruiser and do himself full credit in the exacting position. So this dinner with his nearly fifty officers and officials were invited, was absolutely to his taste. He talked, nothing but "ship" the whole evening, putting clever questions and revelling in the "salt atmosphere", whilst he related two or three personal reminiscences with excellent point.

Unmilitary and Ridiculous

Officers of Grenadier Guards Reproved For Using Umbrellas While Fighting

It is an extraordinary fact that British soldiers once fought under umbrellas. During the action of 1813 the Grenadier Guards occupied a redoubt on the right side of the high road. The Duke of Wellington, passing with some of his staff, looking round, saw to his surprise a great many umbrellas with which the officers were protecting themselves from the falling rain. He sent Lord Hill with the message "Lord Wellington does not approve of umbrellas during the enemy's firing." Later on he issued the order, "The Guards may in uniform, when on duty at St. James', carry them, if they please, but on the field it is not only ridiculous but unmilitary."

Reviving Argument To Reform Calendar

System May Not Be Readily Adopted By World

Now that the Greek churches have abandoned the old Julian calendar and brought their year into agreement with that of all the European and of the American nations, the time is ripe, many persons think, for a thoroughgoing reform of the Gregorian calendar itself. The advocates of the improved calendar of thirteen months of last four weeks each, and one extra day to be known as "New Year's Day", are reviving their arguments and predicting the early adoption of their system by the world. They are a hopeful as well as a logical group, but we think they will find the going harder than they expect.

An Interesting Inscription

The following interesting and ingenious inscription is alleged to have been found some years ago in Devon, England, inscribed in a curiously shaped stone of black basalt. It naturally aroused quite a bit of interest amongst antiquarians:

Favors Vancouver As Western Grain Outlet

Logical Port for Alberta and Western Saskatchewan. Says J. H. King

Year by year it becomes increasingly evident that Vancouver is "the logical location" for the outlet of the western grain crop—at least that portion of it which is shipped from Alberta and Western Saskatchewan. Such was the opinion, expressed by Hon. Dr. J. H. King, Minister of Public Works, in an interview at Toronto. Dr. King is intimately acquainted with the facts there for handling the grain crop. "This year we will get all the grain and take new pits for coal," he said. "We put through about 20,000,000 bushels last year."

He estimated that the port would handle 40,000,000 bushels this year.

Many Uses For Peach Pits

Peach pits used to be considered worthless. However, during the world war, the United States used every peach pit it could get as part of the composition put in the canisters of gas masks to absorb the poisonous fumes from the air. Now enterprising firms are using peach pits for coal and as a high-grade poultry and stock food.

Able to Walk

Man—Is New York the next stop?

Carrier—Yes, sah; brush you off, sah!

Man—"No, I'll get off myself."

Name It

Tourist—Here is it to the nearest filling station?

Moonshiner—What kind?

Moonshiner—Gasoline.

Tourist—No, it's a new kind of moonshine.

Blairmore Lodge, No. 68, meets every Tuesday night at 8 p.m., in the Oddfellows' hall. Officers for the ensuing term: N.G.—M. B. Huffman, V.G.—G. T. S. Dawson; Rec. Sec.—E. McEwen; Fts. Sec.—H. James; Treas.—J. Montalbetti.

Crows' Nest Encampment No. 8, meets on the second and fourth Wednesdays of the month in the I.O.O.F. hall at 8 p.m. Officers for ensuing term: W. Patterson, C.P.; James Crowder, S.W.; K. Oliver, R.S. and F.S.; Jos. Montalbetti, Treas.

Crowview Rebekah Lodge, No. 66, meets the first and third Thursdays of the month at 8 p.m. Officers: Sister Evans, N.G.; Sister Joyce, V.G.; Sister James, F.S.; Sister Hood, F.S.; Sister N. Evans, Treas.

Bellevue Lodge No. 118, meets every Monday night at 8 p.m. Officers: H. Peters, N.G.; F. Beale, V.G.; W. Goodwin, Sec.-Treas.

Armistice Encampment No. 17, Bellevue, meets the first and third Wednesdays of the month. Officers: A. B. Carr, C.P.; Stephen Berry, H. P. Harry Jepson, S.W.; Fred Padgett, J.W.; E. Eckoffin, treasurer; Charles W. Ray, Scribe, Sec. 6

Ray of Hope Rebekah Lodge No. 67, meets the first and third Wednesdays of the month. Officers: Sister Litherland, N.G.; Sister Beale, V.G.; Sister Blake, R.S.; Sister Christie, F.S.; Sister Goodwin, Treas.

Visitors of the Order are cordially invited to attend the above lodges.

Blairmore, Alberta

A local citizen was returning from Coleman late one evening last week. When but a short distance from home one of his truck lights went out and the driver decided to drive slowly and carefully the remainder of the distance.

The one-eyed car, however, did not escape the vigilance of a police officer, who summoned the driver to appear before Magistrate Gresham, who in turn imposed a fine of \$2.00 and costs. We have travelled through the Crows' Nest Pass a few times in recent years and have noticed, not only civilians, but police officers driving cars after night without headlights and right in the cities of Edmonton and Calgary, where traffic is almost as glib as that in Blairmore, have scores of times witnessed cars in operation at night time minus the required head or tail lights and the driver is not always to blame.

It is possible that one head light should go blank and not be noticed. It is also possible that the tail light might go out on one's trip, and the driver not know it. The only means of avoiding such occurrences would be to either have some person preceding and following your car on foot, keeping close watch, or else have the driver stop his car every few yards and get out to see for himself.

BE AN EDITOR

Some of Will Carleton's happy days must have been spent on a country weekly. That he knows many of the trials and tribulations, and some of the joys of being a community editor is to be seen by these lines:

"The editor sat in his sanctum and looked the old man in the eye. Then glanced at the grinning young hopeful and mournfully made his reply:

Is your son a small unbound edition of Moses and Solomon both?

Can he compass his spirit with meekness and strangle a natural oath?

Can he leave all his wrongs to the future and carry his heart in his cheek?

Can he do an hour's work in a minute and live on a sixpence a week?

Can he courteously talk to an equal and browbeat and impudent dunce?

Can he keep things in apple-pie order and do half a dozen at once?

Can he press all the springs of knowledge with quick and reliable touch?

And be sure that he knows how much to know, and know how to know too much?

Does he know how to spur up his virtue, and put a check-rein on his pride?

Can he carry a gentleman's manners without a rhinoceros' hide?

Can he know all, and do all, and be all with cheerfulness, courage and vim?

If so, we, perhaps can be makin' an editor outen of him."

Blairmore possesses the only real suspension bridge in Alberta and a picture of that bridge, enlarged and published, would do anything but justice to the department of the government responsible for such a condition.

We refer to the freak structure that has been placed across the river to replace the twin bridges washed out by the spring floods. The remains of the bridge are suspended to two log stringers, in which this travelling public of this district must confide for the safety of their lives. If you travel slowly over this structure you soon become seasick and the sensation reminds one of that accompanying aeroplaning. Blairmore is bounded on the east by another structure, holes in which are no large and numerous that new pilots will have to be added to the compass to assist drivers and pedestrians in navigating their way safely across the death-trap. The music of the loose bolts in this structure produce music that might soothe the worries of only the minister of public work of this province.

We are asked to correct an impression abroad to the effect that the Calgary Institute of Technology is an institution to serve only the city of Calgary. It is a provincial institution and at the service of the people of the whole province and is under the direction of the provincial department of education. Joseph H. Ross, is acting principal. The courses provided include mechanical engineering, steam engineering, electrical engineering, tractor engineering, gas engine work, machine shop work, garage, forging, woodworking, battery and ignition and vulcanizing. Course fees are from five to ten dollars. Dressmaking and millinery, as well as courses in mining, are offered. The total enrolment at present is 966, of which 392 are for correspondence.

The Dominion government will be represented at the international labor conference to be held in Geneva in October, under the auspices of the League of Nations, by Lucien Paed, secretary to the high commissioner's office in London, and Miss Caroline Carmichael, of New Glasgow, N.S., president of the Women's National Council of Canada.

LOST—A Brooch, (bird inset in diamonds). Finder will be rewarded on returning same to Enterprise Office.

A Waterton Lakes orchestra staged a dance at the opera house on Tuesday night last.

Labor Reductions On Automobile Repairs

We are now operating our repair shop on the Flat Rate Plan. By this plan the automobile owner knows what the job is going to cost before the work is commenced. The following are a few prices on Chevrolet repairs:

Overhaul Motor	\$33.00
Overhaul Rear Axle and Propeller Shaft	\$8.25
Overhaul Transmission and Universal	\$8.25
Grind Valves and Clean Carbon	\$3.50
Rebuild Steering Knuckles and Plain Arms	\$4.50
Rebore and Adjust Brakes (per set)	\$3.00
Tighten Main and Connecting Rod Bearings	\$7.75
Clean Carburetor	\$1.00
Retune Ignition	75c

BLAIRMORE ALBERTA

The members of Crowview Rebekah Lodge are holding a whist drive in the I. O. O. F. hall tonight.

About forty took the "Dokies" degree at a big meeting of Pythians held at Fernie on Labor Day.

In these "prohibition" days it is impossible for even the mayor to hand you the keys of the whole town.

It may be a happy day for the attorney-general's department if a probe into the charges made some time ago by Mr. J. W. McDonald, K. C., of Macleod, is not permitted during their tenure of office.

Mr. H. C. Turnbull, who conducts a watchmaking and jewelry establishment at Big Valley, Alberta, is in The Pass this week, looking for a new location. He is accompanied by Mrs. Turnbull.

On Sunday night last we sat next to a Scotchman at the Union Church. When the collection plate was coming around, we were obliged to nudge him to wake him up.

A local young lady, who hopes soon to join the great army of benedictines, is advertising for a girl or woman capable of looking after children. She evidently believes in Preparedness.

Local storekeepers are again getting into the habit of leaving their stores in total darkness at night—a temptation to burglars and affording no chance for police protection.

Some party is responsible for distributing poison, which caused the loss one day this week of twenty out of twenty-two geese belonging to Mrs. E. Kidd. The loss is a serious one.

Judge A. A. Carpenter, chairman of the public utilities board of the province, has been appointed chairman of the minimum wage board, to succeed A. G. Browning, who has gone to Ontario.

Lethbridge has lots of private residences that are not considered "private residences" by the liquor act authorities, and occasionally one reads of Mrs. or Miss So and So paying a fine of \$100 for having liquor in her possession. Seems to be that with that class the amount of the fine never varies—\$100 is the minimum and maximum penalty.

A party of Swiss editors are visiting the province this week, in charge of officials of the C. P. I.

One lighted gas jet consumes as much air as four people or a book agent.

A large quantity of monshine liquor was destroyed by the local A.P.P. last week. Most of the stuff was of the tear-gas variety.

Commissioner and Mrs. William Eadie, of the Salvation Army in Japan, formerly of Western Canada, are reported safe.

In Tibet marriage is considered a very difficult and troublesome institution. It only happens in wealthy families.

Because a fellow in California decided to pay his fine with five thousand pennies, the judge charged him five dollars extra.

Love may be blind, yet a girl can see more in the man of her choice than a physician can with the aid of an X-ray.

The Blairmore public school opened for the fall term with some of the classes crowded to the extent of over fifty pupils. In fact, Miss Galloway has an enrolment of 59.

A resident of Ladner, B. C., was convicted of selling beer to three provincial constables and was sentenced to serve three months in jail.

Mr. A. W. Baxter, of the Calgary Institute of Technology and Art, was in town on Monday in connection with the re-opening of fall and winter classes here.

Latest reports from the Japanese quake area place the number of dead at less than 160,000. First reports placed the number at near half a million.

Kenora, Ontario, is to have the largest paper mill in the world to cost about \$30,000,000. The new pulp and paper plant now going up in Newfoundland represents an outlay of about \$25,000,000.

Francis—"Oh, Charlie, you don't know what you've done! Father has always declared he'd shoot the first man who kissed me!"

Charlie—"By jove! And—tell me, did he really do it?"

Railroad Man Gives Out Surprising Facts

"If any in my family were sick with stomach trouble or run-down condition, I would rather have one bottle of Tonic than all the other medicines put together." Is the positive statement of F. A. Barrowcliff, a Locomotive St. Hamilton, Ont., well-known yardman for the Grand Trunk Railroad.

"My wife's health was restored by the Tonic treatment in such short order it was astonishing, for she suffered so terribly with nervousness, headaches, sleeplessness and loss of appetite that I thought she would break down completely. She would eat after meals without eating, and

was so fearfully weak the care of our five children and the household was more than she could do.

"After my first few doses of Tonic my wife was like an entirely different person, and hasn't had a sick spell since she quit taking the medicine six months ago. Tonic has certainly been a blessing in our house, and we are glad to recommend it."

Tonic is for sale by all good druggists. Accept no substitute. Over 37-million bottles sold.

Tonic Vegetable Pills are Nature's own remedy for constipation. For sale everywhere.

WORLD HAPPENINGS BRIEFLY TOLD

A grant of \$36,000 to the Salvation Army in aid of its Canadian enlargement work in Great Britain has been authorized.

At the end of June expenditure in connection with the British Empire Exhibition amounted to over \$6,000,000.

What is claimed to be a world's record for loading cattle aboard a steamer was established when 282 head of cattle were loaded aboard the Canadian Victor in 25 minutes.

Dancing at sea to wireless music broadcast from London is being enjoyed daily by passengers cruising from Brighton to Isle of Wight in the pleasure steamer Queen of the South.

The transference of the British admiralty staff from Dover to other dock yards, which is proceeding apace, marks the end of Dover as a naval base.

Letters may now be posted for dispatch by through air mail from London to Bremen, Hamburg and Berlin, at an air fee of 2d. per ounce. Parcel cannot at present be sent.

Participation of the United States in the permanent Court of International Justice at The Hague was endorsed by the American Bar Association at the closing of its annual convention at Minneapolis.

An Australian defense expert is proceeding to England to carry out an investigation in connection with the proposal to erect factories in Australia for the production of guns, ammunition and high explosives.

China has a population of 456,061,922, according to the annual report of the Chinese post office. The figure is only a vague estimate, compiled from reports of provincial officials, as no systematic method of census taking is followed.

For the first time in the history of Alberta harvesting, a number of farm hands were sent into the Peace River and Grande Prairie country by the Government Employment Bureau. The big crops in the north this year necessitated outside help in the way of harvesting.

A Russian dispatch from Moscow says a Russian volunteer fleet has been formed by the White Star, Red Star, Hamburg-American and North German Lloyd Companies for the development and regulation of overseas emigration, the shipping companies concerned acting as joint association.

Cause of Earthquakes

Contraction of Gas Under Earth's Crust Results in Explosion

What causes eruptions, earthquakes, back, our Earth consisted of a mass of whirling fire gas. As this gradually cooled, a crust formed on the outside, and this crust is what we are living on.

During the cooling (which is still going on) cracks and weak spots were formed in the uneven crust, and it is along these lines of weakness that we get volcanoes (the name, by the way, is taken from Vulcan, the old god of fire).

Inside the crust of the earth is a mass of gas at a temperature higher than anything we can ever conceive. Whether this heat is at the core, or round the core, or even distributed in "pockets," we don't know, but we are certain that there is a simply enormous heat somewhere under our earth's crust.

Any water that percolates through this enormous heat turns immediately into steam, and has to find an exit somewhere—generally through the crater of a volcano. Then, again, as the crust further cools and contracts, it compresses the gas inside until it has to explode somewhere.

Showing Interest in Others

Including Yourself As One of Human Race Makes Outlook Different

When you begin to take an interest in other men, you notice, of course, that their lives are not like yours, not so important, nor interesting, nor promising, but in their drabness they are all curiously alike; they all, with slight variation, are born, are brought up, fall in love according to "the lights, marry, earn their living, grow old and die. When this uniformity begins to interest you, you are making your first intelligent acquaintance with life; and when you have looked at mankind and included yourself in the picture, when you have admitted, however reluctantly, that the single addition does not change the total effect, that life is still simple and uniform and that you are less peculiar than you thought—then you have seen your self at last as one of the human race. From the Literary Digest. By John Erskine.

Predictors Will Teach Health

Instead of Disease Being Cured It Will Be Prevented

Dr. J. C. Lawson, of Los Angeles, made the prediction that the world is not far away from the time when the "doctor" will be a teacher of health instead of doctors of disease. He contends that disease was not an entity, but an abnormal condition. Fear and pessimism in civic and physical life were destructive, and would be overcome by their opposites—optimism and knowledge. When people knew what health was and how it could be maintained, there would be no need for fear. He is stanced the various conceptions of disease and how they all had one common cure.

Creamery Butter Production

Production Last Year Excellent that of Any Previous Year

The total quantity of creamery butter made in Canada in 1922 was 147,752,774 pounds, valued at \$5,530,750, an increase in quantity over the previous year of 19,008,146 pounds, or 14 per cent, and in value of \$3,395,512, or 7 per cent. The production of creamery butter last year excelled that of any previous year.

The total quantity of cheese made in Canada last year was 126,579,473 pounds valued at \$22,067,106, compared with 162,117,494 pounds valued at \$25,710,030 in the previous year.

Huge Bell in U.S. Church. A church in Cincinnati, O., claims to have the largest bell in the United States and, next to the one at Moscow, the largest in the world. This bell is 10 feet in diameter and 12 feet high and weighs 30,000 pounds. When it was hung a number of years ago its deep tones shattered windows in nearby buildings and threatened to shake the supporting tower to pieces. Since then it is sounded only by tapping it with a hammer.

Obliging Young Man. "She's forty if she's a day, and he's just turned twenty-five." What do you suppose he's marrying her for?

"I don't know. It looks to me as though he might be doing it to oblige her parents."—Detroit Free Press.

A Fool. Teacher. (In dramatics.) "Imagine midnight, silent as the grave. Two burglars force open a library window and commences to crack the safe. The clock strikes one—"

Voice in rear—"Which one?"

Minard's Liniment Relieves Colds

CUTICURA HEALS LARGE PIMPLES

On Face, Itched and Burned. Caused Loss of Sleep.

"I was troubled awfully with pimples on my face. Little white spots formed first which later broke out in large, red pimples that itched and caused sleep. They itched and burned causing loss of sleep, and my face was disfigured."

"Other remedies were used with-out success. A friend recommended Cuticura Soap and Ointment so I purchased some, and after using them about a week I got relief. I continued using them and in a month was completely healed."

(Signed) Miss Helen Warner, Williamsburg, Ontario.

Daily use of Cuticura Soap, Ointment and Cream will prevent skin troubles.

Sample Free by Mail. Address: "Cuticura," Dept. 10, P.O. Box 10, Lowell, Mass., U.S.A.

Reasons For Queer Habits

Japanese Have Logical Explanation For Doing Things Backwards

"When I first went to Japan," a long-time American resident of that country is reported in the "Type Metal Magazine," as saying, "they seemed to do everything the 'wrong way.' They saved wood by drawing the saw toward them. They backed their horses into the stalls. When our clocks are striking one, theirs would strike 11. Their blacksmiths worked sitting down and when they wanted to rest they stood up. But gradually I learned that there was a logical reason for each of these seemingly queer habits."

"Pulling the saw prevented buckling. 'When are you in a hurry when you put your horse in the stall or when you take him out?' was the answer of the man who was questioned about the horse. As to the clock, it seems that the Japanese prefer to know how many hours are left in the day rather than how many have passed. And the blacksmith who sits down works with his feet as well as his hands—literally, he has four hands, and he rests all these when he gets up."

DIARRHOEA AND VOMITING Doubled Up With Pains

If you are suddenly attacked with diarrhoea, dysentery, colic, cramps or pains in the stomach or any looseness of bowels, do not waste valuable time but at once procure a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

Mrs. Ernest Morris, 3 Webb St., London, writes: "I take great pleasure in recommending Dr. Fowler's Extract of Wild Strawberry for what it has done for me."

Some time ago I took an awful violent headache, then started to vomit and felt so sick I could hardly stand it all day. Towards evening intense pains came in my bowels and I was just doubled up the pains were so bad; the perspiration stood out like beads on my forehead; then the diarrhoea started and I really thought I was going to die.

My husband went to the drug store and got a bottle of Dr. Fowler's Extract of Wild Strawberry. He gave me four doses; at intervals, and by noon next day the diarrhoea had stopped and the pain was all gone. Now I will never be without 'Dr. Fowler's' in the house.

Price 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Army Officers Taking Up Land

Several Indian army officers have this summer taken up land in the Okanagan and are doing very well. In addition several Canadian veterans have come into the district under the aegis of the Soldier Settlement Board. They are of a fine type and will eventually secure valley land themselves.

To be absolutely safe in the summer one has to stay off the street, out of the water, out of autos, trains and interurbans. How glorious our civilization is!—Ann Arbor Times News.

As far back as the 14th century there are records of a ferry across the River Thames at Woolwich.

Dr. J. C. Lawson, of Los Angeles, made the prediction that the world is not far away from the time when the "doctor" will be a teacher of health instead of doctors of disease. He contends that disease was not an entity, but an abnormal condition. Fear and pessimism in civic and physical life were destructive, and would be overcome by their opposites—optimism and knowledge. Demand For Paper

On Ocean Liners

Management Has Found It Necessary To Install Faster Presses

"Because, according to the management, 'the demand has been larger than could have been predicted,' new and faster printing presses will shortly be installed on the Cunard liners to print the Daily Mail-Atlantic Edition. This paper is set in type, edited and published each day that the liners are at sea. The ships publishing the Daily Mail Atlantic Edition are the Berengaria, Aquitania, Mauretania, Carmania, Franconia, Tyrhenia, Lancania, Calabria, Sarmatia and Seydlitz."

Installation of linotype machines on the first three ships listed above is the latest forward step in this new branch of journalism. Twice a day by arrangement, with the Radio Communication Company, important news events are wirelessly to the ships on the Atlantic. The subscription price is one shilling and threepence for the voyage. Single copies are sold at threepence.

Manslaughter In 2nd Degree

Using a razor—bad stuff—but many people do it for their corns. The only thing that is painless and sure is Putnam's Corn Extract, which does remove warts and corns, cleans them right off. Refuse a substitute for "Putnam's," \$25 everywhere.

Canada Foremost Wheat Grower

A cablegram received at Ottawa from the Canadian Institute of Agriculture at Rome summarizing the world's wheat conditions places Canada in the foremost position as a source of supply for the world's wheat markets. The prospective shipments from principal wheat exporting countries are placed as follows: Canada, 250-million bushels; United States, 180 millions; Argentina, 120 millions; Australia, 40 millions; India, 30 millions; Russia, 20 millions; Balkans, 10 millions.

A Power of Its Own.—Dr. Thomas' Eucalypti has a subtle power of its own. All who have used it know this and keep it in their homes as the most valuable all-around remedy. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Beauties of Canada

New Posters Depicting Scenes of Great Beauty Issued by C. N. Railways

Combining the best work of artists and printers and setting forth the beauties of the country in a manner which appeals instantly to the eye, a series of posters is being issued by the Canadian National Railways and are now being placed on display in the offices of the system and elsewhere in the Dominion and in other countries. The grandeur of the Rockies, typified by Mount Robson, the highest peak in the Canadian Rockies, is depicted in an artistic design on one of the posters, while another shows a magnificent view of Mount Edith Cavell and Lac Beauport, all of which are on the lines of the National system.

The glint of sun upon placid waters, with motor boats and other craft in the foreground and Minaki Inn in the background, carries to intending tourists a message of the beauties of that section of Ontario which lies just 114 miles east of Winnipeg.

The Great Lakes and Port Arthur are depicted in a poster showing the lake and rail routes to intending tourists travelling between Eastern and Western Canada, a deck scene on the S.S. Noronic being the medium through which the poster tells its story of a pleasant journey which may be enjoyed as one sails down their inland seas.

In his poster design of the Lower St. Lawrence, the artist has triumphed and the printer has added the touch of his own art to the result. An aged inhabitant with his oxcart full of freight new hay has ascended a steep hill at the foot of which nestles a quaint old village which in Canada could be found only in Lower Quebec.

Protecting Elk Herds

The elk herds on Vancouver Island, north of Cowichan Lake, are to have a reservation of forty square miles, and the British Columbia Game Board is now engaged in making necessary improvements so that real protection may be afforded this rare species of big game. There are said to be about 200 head of elk in the immediate vicinity of North Cowichan Lake.

A Substantial Profit

On a turnover of \$1,107,222 the co-operative associations of Saskatchewan earned a net profit of \$103,927 during the fiscal year ending April 30th, 1923, according to the annual report of the co-operation and markets branch of the Provincial Department of Agriculture.

There are some \$30,000 Japanese vessels engaged in the fishing industry.

Cow-Testing Progress

Five Provinces Show Considerable Increase in Number of Herds Tested

There were 502 cow-testing centres, 2,685 dairy herds under test, and 28,203 tests conducted this year, mainly under the supervision of Dominion dairy officials, up to the end of June last. Five of the provinces show a considerable increase in the number of herds tested. Saskatchewan shows the largest percentage of increase, with New Brunswick next in line and Alberta a close third. The increase in Saskatchewan is largely due to the efficient work of provincial officials. In British Columbia, with five organized co-operative associations, approximately two thousand cows are tested each month.

Internally and Externally It Is Good.

The crowning glory of Dr. Thomas' Eucalypti is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pneumonia, the chest, colds and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

A Butterfly Farm

Would Raise Insects in California for Color and Decorations

An application for permission to establish a butterfly farm on public domain in the Angeles Forest Reserve has been made to Supervisor R. H. Charlton, Los Angeles, Cal., by John Hewlett, of Redlands, California.

Hewlett stated that if permission were granted to him to use forty acres for that purpose, he would plant the entire tract in flowers he believes butterflies like particularly, and would raise the insects for color and decorations.

Advance In Fur Prices

Furs to the value of \$250,000, 90 per cent of which were sold in New York, London and Paris buyers, were sold at the opening of the fur auction sale at Winnipeg. Beaver, silver fox and bear were in keen demand, beaver advancing 20 per cent, silver fox 50 per cent, and bear 10 per cent.

"Golf," declares a physician, "is an old business." Of course it is; the office always runs more smoothly when the boss takes an afternoon off.

Chicago Evening Post.

PILES

Do not suffer another day with itching, burning, or painful piles. Write to Dr. Chase's Ointment will relieve you at once and keep you free of the disease. Call on Dr. Chase's Ointment, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683,

NO OTHER FOOD HAS THE NOURISHMENT OF BREAD

No other food at any price can compare with Bread—

In sustaining and up-building qualities.

A loaf of good Bread is food and tonic in one.

In itself it contains all the essential food elements—food for bone, food for muscle, food for brain.

Bread is your Best Food—Eat more of it.

MOTHER'S BREAD

Is always pure.

BELLEVUE

Mr. K. A. Strickland wishes to correct a report circulated locally to the effect that he is married. Such report is incorrect.

Mrs. Stitt, of Calgary, is visiting here with her parents, Mr. and Mrs. James Paterson.

Rev. George Webber delivered a "dry" address at Trout Creek on September 9th. It is said that not another fish attended.

Bertram, Huffman, eldest son of Mr. and Mrs. M. B. Huffman, sustained a broken arm at Edmonton on Tuesday of last week. On Saturday last Mr. Huffman also received word that his mother had fractured a limb during the week.

Mr. McLaughlin, of Nova Scotia, addressed a mass meeting of miners at the Orpheum theatre on Sunday night and received an attentive hearing. The chair was occupied by P. M. Christophers, M.L.A.

Toronto's assessments have increased \$28,000,000 the past year.

Henry Ford has invented a new speedometer. At 30 miles an hour a green light shows, at 40 miles a red light, and at 60 miles an hour it plays "Nearer My God To Thee."

A number of local I.O.O.F. members drove to Coleman on Monday night to attend the welcome accorded Grand Master Proudfoot, of British Columbia, and Past Grand Master Tully, of Alberta.

Five hundred automobiles, decorated and conveying Oddfellows and Rebekahs from Washington State, reached Vancouver on September 1st to participate in the fourth international rally of the Encampment branch of the I. O. O. F.

Miss Hazel Brown has returned from San Francisco, where she spent her holidays with an old college friend. While in San Francisco and Spokane, Miss Brown continued her studies under the direction of E. Berhenke and U. Martucci.

If Honorable Alexander Ross, minister of public works with the Alberta government, failed to notice any ruts in the roads through The Pass, he surely must have been "up in the air." And one has to be high up to miss them.

So fast has the Dominion government buffalo herd at Wainwright grown that it is now found necessary to slaughter two thousand head. A contract has been given for this to an Edmonton man, and a factory for the manufacture of pemican from the buffalo meat, is to be established in Edmonton. This food is used extensively in the north.

Recently a Rossland woman was sentenced to a month's hard labor for selling beer to three spotters, or stool pigeons. In this connection the woman's evidence in her own defence was not taken with weight, but that of the stool-pigeons, with anything but a respectable record, was accepted in order to jail a poor woman. On the other hand wholesale breaches of the Act guiding the Liquor Control Board of British Columbia were cited, and lots of others could be cited, against parties who seem to be protected.

Local and General Items

For funeral services phone 212. Crows' Nest Pass Undertaking Co.

Contractor Pozzi's saw and door factory is now operating full time.

Blairmore was visited by a heavy frost on Tuesday and Wednesday mornings.

Cardinal Begin, of Quebec, has begun his trail after illicit manufacturers of liquor.

The Pythian Sisters of Greenhill Temple conferred their degree on Friday night last.

We hope to publish the Bellevue Horticultural Show prize list in complete form in our next issue.

One thing the war did: A lot of tightwads could cover it over by calling themselves thrifty.

A bear, a cub and a goat, were the trophies brought to town by a local nimrod from the hills last week.

Joe Legace was hunting dandelions and mushrooms on Friday last with a jointed fish pole and cast of hooks.

The Edmonton Eskimos intend to play exhibition games of hockey at Toronto, Ottawa and Montreal in December.

The Coleman central public school, to which a two-room addition has just been built, is to receive a coat of stucco.

Alphonse Fabro's hair is now about 60 degrees lighter since the narrow escape he had when lost in the bush a week or more ago.

We regret that in an item appearing in our last week's issue the word "bears" should have been misspelled "bares."

The local branch of the Red Cross heads the provincial list of contributors to the Japanese Relief Fund with a cheque for \$25.00.

Miss McLennan, of the Prince Rupert hospital nursing staff, arrived last week end on a visit to her parents here.

A road hog is the one who kicks dust in your face after you have passed seventeen others and kicked just in their faces.

At the regular meeting of Bellevue I.O.O.F. lodge on Monday night, it is expected at least three candidates will be initiated.

Why not station a police officer on the Blairmore West suspension bridge to advise victims which way to fall when they break through?

Miss Ferguson, formerly of the Greenhill Grill and the Lethbridge Silver Grill, has accepted a position as waitress at the Cosmopolitan.

D. H. Proudfoot, of the Nelson Chevrolet Motors, was a visitor in Blairmore this week. He returned home to Nelson on Tuesday morning.

Mr. Veitch, former member of the Irish constabulary, arrived from Ireland about two weeks ago and has accepted the position as janitor and special constable at the Blairmore courthouse and A.P.P. barracks.

A Chevrolet car, driven by a nineteen-year-old lad named Sciotte, took a header into the municipal band stand on Victoria Street on Sunday evening when attempting to avoid collision with another car. Beyond the breaking of the front axle, windshield and springs, little damage was done the car and the occupants escaped alive. Action for damages to the bandstand may be instituted by the town.

Dick Marshall won the decision over Dan McDonald at Michel on Saturday night last in a ten-round go with the gloves. Dick came out without a scar and had difficulty in extending the game so as to give patrons the worth of their money in the exhibition. Dick is in excellent trim and would welcome a match with any 175-pounder.

When a woman loses her temper she shows her age.

Saturday last was one of the busiest days in years for local stores.

An airplane being built in France is expected to do 250 miles an hour.

If kept continuously running a watch will tick 160,144,000 times in a year.

James Tremlett Leigh, of Cowley, has been appointed a commissioner for oaths.

H. R. Parsons has bought out the business of Hartshorne & Kemmis at Waterton Lakes.

Very few boys are as good as their parents think, or as bad as their neighbors think.

Mike Trellis is suing Joe Lombardi for \$475 damages in connection with a recent auto collision in Blairmore.

Canadian cattle for England may be tattooed instead of branded, according to a statement issued recently.

Joe Lee, proprietor of the Lethbridge hotel, has received word of the death of his only brother, at Leeds, England. Deceased was fifty-two years of age.

The Rocky Mountain Polo Pony Ranch, Limited, with head office in Calgary and a capitalization of \$20,000 has been incorporated under the Companies Act of the Province of Alberta as a limited company.

Italy has agreed to accept the terms of the allied ambassadors and to evacuate Corfu and adjacent islands when Greece satisfies all Italy's demands for reparations, and Greece, it is said, is ready to conform to the terms.

When one reads the eulogies accorded a dead citizen by some papers it seems to make one feel like dying right where that paper is published. And there are papers that will never say a good word for a citizen or a community until either are dead.

R. D. Waugh, chairman of the Manitoba Liquor Board, is to receive a salary of \$12,000 and the other two commissioners will receive \$5,000 each. As long as they can pull down such a salary there is no doubt but that they will advocate Manitoba's liquor system.

Forty-nine big printing plants in Berlin do nothing but print money night and day, seven days a week. In the first week in July, the incredible amount of nearly three trillion marks was added to the paper currency. Nothing less than a thousand-mark note was printed.

The following is an actual dialogue between two recent arrivals from the Old Country: "Gie us fower-r-r bits wuth o' choekluttis, Missus!" "Fower what's o' what? Tuk Ing-lah, mon."

"Gie us two bobs o' choeklit suck-ers, mither!"

"E-e-e, by gum, na tha't talkin! A canna mak' t' talk out o' onny on ye."

An exchange remarks: "The Ford Motor Co. will send out a caravan (date to be announced later) consisting of trucks, open and closed cars, tractor, farm machinery, separators, road graders, etc. There will be a demonstration of threshing, road grading, plowing, etc., which will be very interesting and which everyone should see. Watch for dates and be sure to be on hand as the Company want to demonstrate to you how easily farming can be done with Ford products."
